SUMMARY

I'm an artist and Software engineer proficient in HTML, CSS Flexbox, and React. I have 8+ years as an illustrator and designer, which means my expectations for beautiful and functional websites are super high. In addition, I've spent 15~ years in the service industry which ensures my ability to connect with and satisfy clients.

SKILLS

Front-End: JavaScript ES6, ReactJS, React Hooks, Redux, jQuery, HTML5, Bootstrap, and CSS3.

Back-End: Nodejs, MongoDB, PostgreSQL, Knex, and Express

PROJECTS

Pomodoro Timer | [Code](#)

- A timer to maximize productivity by encouraging frequent rests and breaks
- Created using React with hooks, functions, routing, all while debugging through console output.

FlashCards App | [Code](#) |

- A platform for users to add, edit, delete, and study flashcards.
- Used state effectively over multiple components.
- A mobile-first development and responsive website using React.

Portfolio | [Code](#) | [Site](#)

- A project to showcase my personal journey and decision to become a software engineer
- I utilized many HTML elements including headers, lists, and links while using comments to explain my code
- While using CSS properties for design I also built semantic containers such as main, article, and footer

EXPERIENCE
